

# ATTENTION WATER CUSTOMERS:

## Do you have an estimated water bill?

If the read code on your water bill is an "E" you have received an estimated bill and we ask that you contact the Water Department immediately at 845-243-1247. This will allow us to investigate, make any necessary repairs and amend your invoice accordingly.

Accounts that remain estimated for many quarters are a detriment to the customer in that once we've finally gained access, there is potential for a large bill, as your meter continues to register your usage in spite of the inaccurate readings.

Please contact us with any questions you may have at 845-838-5004.
