

**CITY OF BEACON
CITY COUNCIL**

RESOLUTION NO. 87 OF 2022

**RESOLUTION IN SUPPORT OF THE NEW YORK STATE CLIMATE ACTION COUNCIL
AND THE CLIMATE ACTION COUNCIL'S SCOPING PLAN**

WHEREAS, the Sixth Assessment of the International Panel on Climate Change (IPCC) finds that climate change is causing dangerous and widespread disruption in nature and affecting the lives of billions of people around the world; and

WHEREAS, the IPCC Assessment concludes that rapid, deep and sustained reductions in global greenhouse gas emissions (GHG) are necessary, including accelerated action in this critical decade, to limit global warming to between 1.5°C and 2°C in this century; and

WHEREAS, New York State recognizes the urgent need to reduce and eliminate GHG emissions in the atmosphere, passing the 2019 Climate Leadership and Community Protection Act ("Climate Act") committing the State to:

- reduce GHG emissions by 40 percent below 1990 levels by 2030, and achieve net-zero emissions by 2050;
- meet 70 percent of electricity needs from renewable resources by 2030, and 100 percent of electricity needs from zero-emissions resources by 2040;
- ensure a just and equitable transition that leaves no one behind, and dedicate up to 40 percent of the benefits of clean energy investments to Disadvantaged Communities; and

WHEREAS, the New York State Climate Action Council has approved for public comment a Draft Scoping Plan to meet New York's climate and equity goals; and

WHEREAS, the Scoping Plan calls for shifting to energy-efficient electrification in buildings and transportation as the primary solution to replace fossil-fuel combustion in these sectors, which together account for 60 percent of the state's carbon emissions; and

WHEREAS, the Scoping Plan calls for a phase-down of emissions from fossil fuel-fired electricity generation, while ensuring support and protections for impacted workers as they transition to clean energy jobs; and

WHEREAS, the 2021 Jobs Study by the Just Transition Working Group for the NYS Climate Action Council estimates that meeting New York's climate goals will result in a net gain of 189,000 jobs across the state by 2030, alone, with a ratio of jobs gained to jobs displaced of 10 to 1; and

WHEREAS, the Scoping Plan includes measures that would expand the development of renewable resources and battery storage, encourage "agrivoltaics," or the co-location of agricultural

activities with solar and wind, and provide resources to communities to assist with renewable siting and land-use planning; and

WHEREAS, the Scoping Plan recognizes the critical role that rural landscapes play, both natural and working lands, in sequestering carbon emissions and enabling the state to achieve net-zero emissions, and the importance of agricultural land preservation, open space protection, support for farmers to improve soil health, and policies that expand afforestation and reforestation and incentivize and assist private landowners in implementing sustainable forest management practices; and

WHEREAS, the Integration Analysis for the Scoping Plan finds that meeting emissions reduction goals of the Climate Act is technically feasible and will have the additional and significant benefit of improving public health by eliminating co-pollutants from fossil fuel combustion, resulting in an estimated \$50 to \$120 billion in health-related savings by 2050; and

WHEREAS, according to NYSERDA, over half of what New Yorkers currently spend on energy leaves New York, mostly for fossil fuels; and

WHEREAS, our communities would be better served by keeping energy spending primarily within the local economy; and

WHEREAS, the City of Beacon recognizes the existential threat posed by climate change and has established local policies to require the City to meet or exceed goals established in the Climate Act for all government operations in addition to also facilitating and encouraging residents and local businesses to reduce their GHG emissions

NOW, THEREFORE, BE IT RESOLVED, that the City of Beacon affirms the critical importance of meeting the emissions and equity goals of the Climate Act, which will help mitigate dangerous climate change while delivering the additional benefits of improving public health, economic opportunities, agricultural land open space protection, and quality of life for the people of Beacon; and

BE IT FURTHER RESOLVED, that the City of Beacon declares its support for prohibiting an expansion of fossil fuel infrastructure, which contradicts the goals of the Climate Act, and for transitioning to efficient electricity-based solutions for buildings and transportation; and

BE IT FURTHER RESOLVED, that the City of Beacon supports a planning process for a managed transition of the utility gas system that will maintain affordable, safe, and reliable utility service and protects low- and moderate-income households from an undue burden in the transition; and

BE IT FURTHER RESOLVED, that the City of Beacon supports the recommendations of the Scoping Plan for advanced building codes that will improve the energy efficiency of new buildings, creating healthier living and work environments, and reduce monthly energy costs; and

BE IT FURTHER RESOLVED, that the City of Beacon supports the recommendations of the Scoping Plan to phase in building code requirements prohibiting on-site combustion of fossil fuels in new buildings over a 2024-2027 period; and

BE IT FURTHER RESOLVED, that the City of Beacon calls on the Climate Action Council to include in the Scoping Plan the necessary policies and support to help owners of existing buildings improve energy efficiency and transition to zero-emissions equipment, ensuring cost parity with fossil systems, with incentives and financing assistance as necessary; and

BE IT FURTHER RESOLVED, that the City of Beacon supports Scoping Plan recommendations that make electric vehicles more affordable relative to gas-powered vehicles, and expand fast-charging infrastructure; and

BE IT FURTHER RESOLVED, that the City of Beacon urges the Climate Action Council to include in the Scoping Plan recommendations to expand assistance for all-electric upstate municipal transit systems; and

BE IT FURTHER RESOLVED, that the City of Beacon urges the New York State Department of Environmental Conservation and NYSERDA to immediately launch a sustained statewide public education and information campaign on the benefits of a clean energy economy and climate-friendly choices by consumers of heating and cooling systems, transportation, and products and appliances; and

BE IT FURTHER RESOLVED, that the City of Beacon shall forward copies of this resolution to the Commissioner of the NYS Department of Environmental Conservation, President of NYSERDA, Chair of the NYS Public Service Commission, the NYS Climate Action Council, and Members of the State Senate and Assembly representing the City of Beacon.
